# WHO WE ARE

Since 2009, GDI Medical, a Division of Green Dream International LLC (GDI), has been providing logistics and supply services to various public and private agencies and healthcare institutions throughout the US and internationally. We have successfully performed over 480 contracts with the federal government alone and an equal number of projects with various state and local governments, not to count the supply projects we have successfully performed for commercial institutions including many hospitals and healthcare organizations.

We have also been very active in health related services, including the fight against the COVID-19 Pandemic, and support for various public health emergency incidents such as the recent 2019 Hurricane Dorian in North Carolina or the public health emergency of 2016 due to the Zika virus outbreak as well as the public health emergency of 2010 for the H1N1 Flu outbreak. We are confident that we can provide the critical supplies and services that are need to fight off the COVID-19 pandemic by public agencies as well as related institutions and those enterprises that are forced to continue to work despite the virus situation.

With a vast network of domestic and international providers as well as our established transportation system (including our own charter flights as well as Fast Ships from South East Asia), we are sourcing and importing the highly needed PPE items to help federal and state/local agencies as well as large enterprises in their fight against the pandemic. Having an established procurement system in place, we provide an extremely fast delivery system for all bulk health related equipment and can extent this service to any public entity (federal, state and local).

- US Company
- 11 Years of Experience
- Over 800 clients in US
- Over 500 Public Agency Clients
- 3 Warehouses Strategically Located
- Own Supply Chain System in Place
- Bulk Purchase Discounts

A person wearing a blue checkered uniform and blue gloves is working with stacks of blue surgical masks. The masks are neatly folded and packaged in clear plastic bags, arranged on a grey table. The person's hands are visible, one pointing towards the stacks. A green paper tag is clipped to the person's uniform. The background is slightly blurred, showing more stacks of masks.

Masks  
&  
Respirators

### Who is NIOSH?

The National Institute for Occupational Safety and Health (NIOSH) is the federal agency responsible for conducting research and making recommendations to prevent workplace injuries and illnesses.

### What is an N95 respirator?

The NIOSH respiratory protection approval regulation (42 CFR 84) defines a filtering facepiece respirator that filters out at least 95% of airborne particles during “worst case” testing using a “most-penetrating” sized particle is given a 95 rating.

### NIOSH Approval Labeling

All NIOSH-approved filtering facepiece respirators are marked with the manufacturer’s name, the part number (P/N), the protection provided by the filter (e.g., N95, P100), and “NIOSH.”
