

[GDI](#)
Green Dream International

Good day,

[GDI](#) (Green Dream International) is registered in many States, Counties and Cities. GDI has also been supplying ISDs in many areas from the LA Unified School District; the Nation's second largest all the way to New York and Florida. In some cases we are providing PPE equipment to school districts of an entire county such as the 33 school districts in Wayne County in Michigan (see [awarded RESA Contract](#)). GDI would be honored to provide its support to your institution too.

Main items we have in stock and/or are providing in bulk quantities include: Face Masks, Gloves, Gowns, Sanitizers & Wipes, Thermometers & UV Disinfectant Cabinets.

Please reply to this email if you are in need of any of these items in Small or large quantities or purchase them online from our [online](#) store.

Regards,

National Sales Team

GDI Medical

Since 2009, GDI Medical, a Division of Green Dream International LLC (GDI), has been providing logistics and supply services to various public and private agencies and health institutions throughout the US and internationally. We have successfully performed over 480 contracts with the federal government alone and an equal number of projects with various state and local governments, not to count the supply projects we have successfully performed for commercial institutions including many hospitals and health organizations.

We have also been very active in health related services, including support for various public health emergency incidents such as the recent 2019 Hurricane Dorian in North Carolina or the public health emergency of 2016 due to the Zika virus outbreak as well as the public health emergency of 2010 for the H1N1 Flu outbreak.

We are confident that we can provide the critical supplies and services that are need to fight off the COVID-19 pandemic by public agencies as well as related institutions and those enterprises that are forced to continue to work despite the virus situation.

With a vast network of domestic and international providers as well as our established transportation system (including our own charter flights as well as Fast Ships from South East Asia), we are sourcing and importing the highly needed PPE items to help federal and state/local agencies as well as large enterprises in their fight against the pandemic.

Having an established procurement system in place, we provide an extremely fast delivery system for all bulk health related equipment and can extent this service to any public entity (federal, state and local).

We look forward to working with your organization and believe that we provide the services and knowledge that can alleviate the needs of your organization and provide the needed support to our front line “war fighters” during these hard times.
